Papers for publication and all editorial communications should be addressed to the Editor, University Department of Anaesthesia, Leicester Royal Infirmary, Leicester LE1 5WW; business communications to the publishers: Professional & Scientific Publications Ltd, BMA House, Tavistock Square, London WC1H 9JR.

The GUIDE TO CONTRIBUTORS can be found on pages viii, x & xii of the advertisement section of this issue.

Published monthly: Annual subscriptions: UK/Eire £74.00; Abroad £98.00; USA $143.00 (direct orders only). Trainee rate UK/Eire £45.00; Abroad £58.00. Airmail rates on application. ISSN 0007-0912. Orders must be accompanied by payment; cheques should be made payable to Professional and Scientific Publications. Orders and payments should be sent to Professional and Scientific Publications, BMA House, Tavistock Square, London, WC1H 9JR. Orders in the United States of America may be sent to Professional and Scientific Publications, Box 560B, Kennebunkport, Maine 04046.

Patient O₂ is now the Datex standard

Ordinary oxygen sensors provide an alarm for low circuit O₂, but they don't monitor patients. Working together with anaesthetists, Datex has developed a maintenance-free paramagnetic O₂ sensor which offers you PATIENT O₂, as well as circuit oxygen monitoring.

Patient safety in routine anaesthesia is primarily dependent on adequate oxygenation. By monitoring the end-tidal oxygen level and the inspired-expired oxygen difference (FiO₂ - EtO₂), PATIENT O₂ is really your first guarantee of patient safety.

PATIENT O₂ is the fastest detector of hypoventilation and the most specific detector of alveolar hypoxia. Indicating a mismatch in patient oxygen delivery and patient oxygen consumption literally breath-by-breath.

First introduced by Datex in Cardio-cap and Capnomac, PATIENT O₂ is now available in Ultima, Oscarxy and NormocapOxy. PATIENT O₂ is the Datex standard.

DATEX
safe anaesthesia care
CONTENTS

EDITORIALS: 1. Awareness and memory in anaesthetized patients .............................. 603
   D. Griffiths and J. G. Jones

II. Omeprazole—a useful new agent? ................................................................. 607
   D. J. Rowbotham

ORIGINAL ARTICLES

Levels of consciousness in volunteers breathing sub-
MAC concentrations of isoflurane ................................................................. 609
   Luff

Effect of oral omeprazole on intragastric pH and volume in women undergoing elective Caesarean
section .................................................. 616
   T. Gin, M. C. Ewart, G. Yau and T. E. Oh

Diclofenac for day-care arthroscopy surgery: comparison with a standard opioid therapy ........... 620
   C. McLoughlin, M. S. McKhemy, J. P. H. Fee and Z. Boulei

Effect of indomethacin on pain relief after thoracotomy ........................................ 624
   T. Pavy, C. Medley and D. F. Murphy

Preanaesthetic medication with clonidine ........................................................... 628
   P. M. C. Wright, U. A. Carabine, S. McClune, D. A. Orr and J. Moore

Quantitative assessment of extradural bupivacaine analgesia ...................................... 633
   L. Arendt-Nielsen, B. Øberg and P. Bjerring

Onset phase of spinal bupivacaine analgesia assessed quantitatively by laser stimulation .... 639
   L. Arendt-Nielsen, E. Anker-Møller, P. Bjerring and N. Spangsberg

Effects of 2% lignocaine on somatosensory evoked potentials recorded in the extradural space ... 643

Comparison of four local extradural anaesthetic solutions for elective Caesarean section .......... 648
   P. Howell, W. Davies, M. Wrigley, P. Tan and B. Morgan

Comparison of Ringer's acetate with 3% dextran 70 for volume loading before extradural Caesarean
section .............................................................. 654
   E. Wennberg, I. Frid, H. Haljamae, M. Wennberg and J. Kjellmer

Pharmacokinetics of propofol in children ................................................................ 661
   R. D. M. Jones, K. Chan and L. J. Andrew

Pharmacokinetics of atracurium during continuous infusion ........................................ 668
   G. H. Beemer, A. R. Bjorksten and D. P. Crankshaw

Pharmacodynamics of atracurium during propofol, thiopentone and opioid anaesthesia ........... 675
   G. H. Beemer, A. R. Bjorksten and D. P. Crankshaw

Late postoperative episodic and constant hypoxaemia and associated ECG abnormalities ......... 684
   J. Rosenberg, V. Rasmussen, F. von Jessen, T. Ulstad and H. Kehlet

Are myotonias and periodic paralyses associated with susceptibility to malignant hyperthermia? 692
   F. Lehmann-Horn and P. A. Iaizzo

Effect of isoflurane on the canine hepatic circulation and hepatic oxygen balance ................. 698
   C. D. Miller, W. Fitch and J. A. Thomson

Nitrous oxide antagonizes CNS stimulation by laudanosine in mice .................................. 704
   M. N. Avramov and K. Meri

Effects of suxamethonium on the cerebrum following disruption of the blood–brain barrier in dogs ... 708
   W. L. Lanier, J. H. Milde and F. W. Sharbrough

Effect of halothane on hypoxic and hypercapnic ventilatory responses of goats .................. 713
   S. O. Koh and J. W. Severinghaus

CASE REPORTS

Sinus arrest induced by trivial nasal stimulation during alfentanil–nitrous oxide anaesthesia ....... 718
   P. L. Bailey

7th nerve palsy after extradural blood patch .................................................................. 721
   D. M. Lone and A. M. McCullough

Anaesthetic hazards of aortocaval fistula ....................................................................... 723
   A. Bodenham

COMMENTARY

I.v. fluids during surgery ......................................................................................... 726

CORRESPONDENCE

Extradural pethidine ............................................................................................... 730
