BOOM, S. J. see DAVIDSON, J. A. H. 315-318

BORGIATTO, A. S. see SlijER, K. 335-337

BÖDINGEN, A. T. AND KIMBER, F. W. Infrachoroidal nerve block in neonates for cleft lip repair: anatomical study and clinical application 506-508

BONTRA, T. see MUNGLANI, R., (ARS) 482P
Anaesthetic techniques, extradural

- blind comparison of 0.5% ropivacaine with 0.5% bupivacaine, GRIFFIN, R. P., et al. 512-516
- Extravascular ropivacaine and bupivacaine in hip surgery, WOLFP, A. P., et al. 458-460
- Extravascular ropivacaine and bupivacaine in hip surgery, CHAMBERS, F. A., et al. 462
- Meningitis after combined spinal–extradural anaesthesia in obstetrics, HURDING, S. A., et al. 351
- Meningitis after combined spinal–extradural anaesthesia in obstetrics, HURDING, S. A., et al. 352
- Meningitis after combined spinal–extradural anaesthesia in Obstetrics, SINTON, R. I., et al. 352
- Meningitis after combined spinal–extradural anaesthesia in obstetrics, WEE, M., et al. 351
- Positive lumbar extradural pressure, SERPELL, M. G., et al. 113
- Positive lumbar extradural pressure, SHAH, J., et al. 113-114
- Posterior column sensory impairment during ambulatory extradural anaesthesia in labour, BUGGY, D., et al. 350
- Posterior column sensory impairment during ambulatory extradural anaesthesia in labour, FERNOANDO, R., et al. 49-50
- Posterior column sensory impairment during ambulatory extradural anaesthesia in labour, WEE, M., et al. 350

Anaesthetic techniques, general

- Cerebral blood flow distribution during induced hypotension with haemorrhage, trimetaphan or nitroprusside in rats, DRUTUS, T., et al. 605-690
- Cerebral blood flow during induced hypotension, MOSS, E., (E) 635-637
- Cerebrovascular response to carbon dioxide during sodium nitroprusside- and isoflurane-induced hypotension, MATTA, B. F., et al. 296-300

Anaesthetic techniques, inhalation

- Isoflurane and desflurane do not disrupt the middle cerebral artery appreciably, MATTA, B., et al. (ARS) 486-487P

Anaesthetic techniques, i.v.

- Comparison of the effects of four i.v. anaesthetic agents on polymorphonuclear leukocyte function, DAVISON, J. A. H., et al. 315-318
- Regional morphine for analgesia after foot surgery, SERPELL, M. G., et al. (ARS) 480-481P
- Anaesthetic techniques, i.v. infusion, Propofol administered by a manual infusion regimen, SEAR, J. W., et al. 362-367
- Total i.v. anaesthesia with propofol and the laryngeal mask for orthopaedic surgery, Dyer, R. A., et al. 123-128

Anaesthetic techniques, regional

- Comparison of two methods of ankle block for foot surgery, MARSHALL, S., et al. (ARS) 481P
- Influence of cold on the recovery of verucernum and decamethonium in humans, ENGLAND, A. J., et al. (ARS) 475P
- Regional morphine for analgesia after foot surgery, SERPELL, M. G., et al. (ARS) 480-481P
- Spinal anaesthesia and aspirin, GOODMAN, N. W., (C) 355
- Spinal anaesthesia and aspirin, MACDONALD, R., (C) 355
- Anaesthetic techniques, regional, brachial plexus, Auditory disturbance associated with intercalaneous brachial plexus block, ROSENBERG, P. H., et al. 89-91

Anaesthetic techniques, regional, retrobulbar
- Metabolic effects of propofol, and benzodiazepine premedication on heart rate variability measured by spectral analysis, HOWELL, S. J., et al. 168-173
- Cardiovascular effects of epidural during anaesthesia and tracheal intubation with propofol, VALLANCE, H., et al. (ARS) 478-479P
- Cerebral pressure autoregulation and carbon dioxide reactivity during propofol-induced EEG suppression, MATTA, B. F., et al. 159-163
- Chest wall movement during induction of anaesthesia with thiopentone, propofol, and etomidate, SPENS, H. J., et al. (ARS) 472P
- Comparison of two standard techniques of general anaesthesia for day-case cataract surgery, MOFFAT, A., et al. 84-89
- Comparison of two standard techniques of general anaesthesia for day-case cataract surgery, MOFFAT, A., et al. 145-148
- Effects of propofol and thiopentone, and benzodiazepine premedication on heart rate variability measured by spectral analysis, HOWELL, S. J., et al. 168-173
- Effects of sub-hypnotic doses of propofol on the side effects of intrathecal morphine, BORGEAT, A., et al. (ARS) 243
- Free-radical-induced redox changes to haemoglobin and their modification by propofol, STRATFORD, N., et al. (ARS) 475P
- Human cytochrome P450 mono-oxygenase system is suppressed by propofol, COOPER, T. L., et al. 558-562
- Interactions between opioid drugs and propofol in laboratory models of seizures, AHMAD, I., et al. 311-314
- Propofol administered by a manual infusion regimen, SEAR, J. W., et al. 362-367
- Propofol pharmacokinetics in children with biliary atresia, RAOP, A. A., et al. 46-49
- Total i.v. anaesthesia with propofol and the laryngeal mask for orthopaedic surgery, Dyer, R. A., et al. 123-128

Anaesthetic techniques, subarachnoid
- Effect of i.v. dexamethasone on the progression of spinal block, HENDERSON, D. J., et al. 610-611
- Haemodynamic effects of subarachnoid block in the elderly, GEE, A. J., et al. 244
- Haemodynamic effects of subarachnoid block in the elderly, CUTHLEY, L. A. H., et al. (ARS) 374
- Haemodynamic effects of subarachnoid block in the elderly, LAMB, F. J. et al. (ARS) 349
- Methohexamine and blood loss in prostate surgery, ALEXANDER-WILLIAMS, M., et al. 362
- Methohexamine and blood loss in prostate surgery, HOWELLS, H., et al. 628
- Prophylactic i.m. ephedrine in bupivacaine spinal anaesthesia, SHERNOLLO, J. E., et al. 517-520
- Spread of subarachnoid hyperbaric amethocaine in adolescents, HIRAYAMA, Y., et al. 348-350
- Spread of subarachnoid hyperbaric amethocaine in pregnant women, HIRAYASHI, Y., et al. 348-350
- Transient radicular irritation after spinal anaesthesia with hyperbaric 2% lignocaine, TAKEDA, P., et al. 328-329

Anaesthetics gases, nitrous oxide
- Analgesic and hypnotic effects of subanesthetic concentrations of xenon in human volunteers: comparison with nitrous oxide, YAGI, M., et al. 670-673
- Effects of skin incision on respiratory pattern during anaesthesia with enflurane and nitrous oxide, SUTHERLAND, R. W., et al. (ARS) 487-488P

Anaesthetics gases, xenon
- Analgesic and hypnotic effects of subanesthetic concentrations of xenon in human volunteers: comparison with nitrous oxide, YAGI, M., et al. 670-673

Anaesthetics i.v.
- Propofol and eltanolone, Chest wall movement on induction of anaesthesia with thiopentone, propofol, and eltanolone, SPENS, H. J., et al. (ARS) 472P
- Comparison of two standard techniques of general anaesthesia for day-case cataract surgery, MOFFAT, A., et al. 145-148
- Anaesthetic techniques, ketamine, Is ketamine a voltage-sensitive Ca2+ channel blocker? LAMBERT, D. G., et al. (ARS) 483P
- Selective effects of ketamine on amino acid-activated pathways in neonatal rat spinal cord, BROCKMEYER, D. M., et al. 79-84

Anaesthetics i.v., pregnanolone, Potency of lipid and protein formulation of 5a-pregnanolone at induction of anaesthesia and the corresponding regional brain distribution, WANG, M. D., et al. 553-557

Anaesthetics i.v., propofol, Bimodality of respiratory time in patients anesthetized with propofol, GOODMAN, N. W. 129-133
- Effects of propofol and thiopentone, and benzodiazepine premedication on heart rate variability measured by spectral analysis, HOWELL, S. J., et al. 168-173
- Effects of sub-hypnotic doses of propofol on the side effects of intrathecal morphine, BORGEAT, A., et al. (ARS) 243
- Free-radical-induced redox changes to haemoglobin and their modification by propofol, STRATFORD, N., et al. (ARS) 475P
- Human cytochrome P450 mono-oxygenase system is suppressed by propofol, COOPER, T. L., et al. 558-562
- Interactions between opioid drugs and propofol in laboratory models of seizures, AHMAD, I., et al. 311-314
- Propofol administered by a manual infusion regimen, SEAR, J. W., et al. 362-367
- Propofol pharmacokinetics in children with biliary atresia, RAOP, A. A., et al. 46-49
- Effects of thiopentone and thiopentone, and benzodiazepine premedication on heart rate variability measured by spectral analysis, HOWELL, S. J., et al. 168-173
Anaesthetics volatile, Alkalization of local anaesthetic for intra-articular instillation during arthroscopy, Richmond, C., (C) 115
—, Alkalization of local anaesthetic for intra-articular instillation during arthroscopy, Smith, I., (C) 114-115
Anaesthetics local, Isoflurane, Comparison of the efficacy and safety of anaesthetics gel applied topically before venous cannulation in adults, O'Connor, B., et al., 706-708
—, Spread of subarachnoid hyperbaric anaesthesia in adults, Harirvash, Y., et al., 41-45
—, Spread of subarachnoid hyperbaric anaesthesia in pregnant women, Harirvash, Y., et al., 384-386
Anaesthetics local, Bupivacaine, Comparison of extradural fentanyl, bupivacaine and two fentanyl-bupivacaine mixtures for pain relief after abdominal surgery, Torda, T. A., et al., 35-40
—, Comparison of ropivacaine and bupivacaine in extradural analgesia for the relief of pain in labour, McCrane, A. F., et al., 261-265
—, Extradural anaesthesia for Caesarean section: a double-blind comparison of 0.5% ropivacaine with 0.5% bupivacaine, Griffin, R. P., et al., 512-516
—, Extradural ropivacaine and bupivacaine in hip surgery, Wolp, A. P., et al., 458-460
—, Intravenous fentanyl and bupivacaine for prevention of severe pain and chronic discomfort after vasectomy, Paxton, L. D., et al., 612-613
Anaesthetics local, Lignocaine, Does spinal anaesthesia result in a more complete sympathetic blockade than extradural anaesthesia? Stevens, R. A., et al., (ARS) 480P
—, Maximum recommended doses of lignocaine are not toxic, Palvi, H., et al., 704-705
—, Transient perineal irritation after spinal anaesthesia with hyperbaric 5% lignocaine, Tarkkila, P., et al., 328-329
Anaesthetics local, Ropivacaine, Comparison of ropivacaine and bupivacaine in extradural analgesia for the relief of pain in labour, McCrane, A. F., et al., 261-265
—, Extradural anaesthesia for Caesarean section: a double-blind comparison of 0.5% ropivacaine with 0.5% bupivacaine, Griffin, R. P., et al., 512-516
—, Extradural ropivacaine and bupivacaine in hip surgery, Wolp, A. P., et al., 458-460
Anaesthetics volatile, Determination of anaesthetic agent concentration by refractometry, Allisson, J. M., et al., 85-88
—, Regional left ventricular diastolic function under inhalation anaesthesia in dogs, Miso, H. R., et al., (ARS) 479P
Anaesthetics volatile, Desflurane, Effect of different volatile anaesthetics on suxamethonium-induced jaw muscle contracture in rats, Shi, Y., et al., 712-713
—, Isoflurane and desflurane do not dilate the middle cerebral artery appreciably, Matta, B. F., et al., (ARS) 486-487P
Anaesthetics volatile, Enflurane, Comparative effects of halothane, enflurane, isoflurane and sevoflurane on function and metabolism in the ischaemic rabbit heart, Oguchi, T., et al., 569-575
—, Effects of isoflurane on regional pulmonary blood flow during Caesarean section, Dwyer, R., et al., 379-383
—, Extradural ropivacaine and bupivacaine in hip surgery, Wolp, A. P., et al., 458-460
Anaesthetics volatile, Sevoflurane, Comparison of halothane, enflurane, isoflurane and sevoflurane on function and metabolism in the ischaemic rabbit heart, Oguchi, T., et al., 569-575
—, Comparison of sevoflurane with halothane: statistically valid? Malagon, I., (C) 724
—, Comparison of sevoflurane with halothane: statistically valid? Tavainen, T., et al., (C) 724
—, Comparison of the effects of sevoflurane, isoflurane and halothane on indocyanine green clearance, Kanaia, N., et al., 164-167
—, Degradation products of sevoflurane during low-flow anaesthesia, Bitto, H., et al., 56-59
—, Effect of sevoflurane on the vascular reactivity of rabbit mesenteric artery, Yamaguchi, A., et al., 576-582
—, Effect of total flow rate on the concentration of degradation products generated by reaction between sevoflurane and soda lime, Bitto, H., et al., 657-669
Anaesthetist, activity, Impressions of British anaesthesia, Bofia, G. M., (C) 111
Anaesthetists, medical/legal, Mishap or negligence, Kitching, A., et al., (C) 111-112
Analgesia, Obstetric, Comparison of ropivacaine and bupivacaine in extradural analgesia for the relief of pain in labour, McCrane, A. F., et al., 261-265
—, I.V. tenoxicam for analgesia during Caesarean section, Elakaim, M., et al., 643-646
—, Spinal anaesthesia and aspirin, Goodman, N. W., (C) 355
—, Spinal anaesthesia and aspirin, Macdonald, R., (C) 355
Analgesia, Paediatric, Circumcision analgesia, Andsersen, K. H., (C) 627
—, Circumcision analgesia, Chambers, F. A., (C) 627
Analgesia, Patient-controlled, Extradural fentanyl for postoperative analgesia: predominant spinal or systemic action? Cooper, D. W., et al., 184-187
—, Psychological characteristics and the effectiveness of patient-controlled analgesia, Thomas, V., et al., 271-276
Analgesia, Postoperative, Is there any clinical advantage of increasing the pre-emptive dose of morphine or combining pre-icnicional with postoperative morphine administration? Collins, R., et al., 396-399
—, I.V. compared with brachial plexus infusion of butorphanol for postoperative analgesia, Wajima, Z., et al., 392-395
—, Prolonged postoperative analgesia for arthrolysis of the elbow joint, Parekh, R. K., et al., 469-471
Analgesia, postoperative

Analgesia, pre-emptive, Effect of different pre-emptive treatments on long-term neuropathic expression in the dorsal root ganglia in a model of neuropathic pain, MUNGLANI, R., et al., (ARS) 482P

— Is there any clinical advantage of increasing the pre-emptive dose of morphine or combining pre-incident with postoperative morphine administration? COLLIS, R., et al., 396–399

— Multimodal analgesia before thoracic surgery, DOYLE, E., et al., (C) 241

— Multimodal analgesia before thoracic surgery, KAVANAGH, B., et al., 241–242

— Multimodal analgesia before thoracic surgery, RICHARDSON, J., et al., (C) 240

Analgesic techniques, Multimodal analgesia before thoracic surgery, DOYLE, E., et al., (C) 241

— Multimodal analgesia before thoracic surgery, KAVANAGH, B., et al., 241–242

— Multimodal analgesia before thoracic surgery, RICHARDSON, J., et al., (C) 240

Analgesic techniques, extradural, Postoperative extradural analgesia, JONES, H., et al., (C) 354

— Postoperative extradural analgesia, WHEATLEY, R. G., et al., (C) 355

— Selection of the optimum opioid for extradural administration in the treatment of postoperative pain, CHURBASIK, S., et al., (E) 121–122

Analgesic techniques, infusion, i.v. compared with brachial plexus infusion of butorphanol for postoperative analgesia, WAJIMA, Z., et al., 392–395

Analgesic techniques, intra-articular, Alkalinization of local anaesthetic for intra-articular instillation during arthroscopy, RICHMOND, C., (C) 115

— Alkalinization of local anaesthetic for intra-articular instillation during arthroscopy, SMITH, I., (C) 114–115

Analgesic techniques, regional, brachial plexus, i.v. compared with brachial plexus infusion of butorphanol for postoperative analgesia, WAJIMA, Z., et al., 392–395

Analgesic techniques, regional, interpleural, Intrapleural injection, an unusual complication of interpleural analgesia, DUTTA, D., et al., 98–99

Analgesics non-opioid, ketorolac, Normal postoperative gastric emptying after orthopaedic surgery with spinal anaesthesia and i.m. ketorolac as the first postoperative analgesic, PETRING, O. U., et al., 257–260

Analgesics non-opioid, tenoxicam, i.v. tenoxicam for analgesia during Caesarean section, ELHAKIM, M., et al., 643–646

Analgesics non-opioid, tramadol, Tramadol, EGGERS, K. A., et al., 247–249

Analgesics opioid, alfentanil, Selective effects of alfentanil on nociceptive-related neurotransmission in neonatal rat spinal cord, FENG, J., et al., 691–696

— Analgesics opioid, butorphanol, i.v. compared with brachial plexus infusion of butorphanol for postoperative analgesia, WAJIMA, Z., et al., 392–395

— Analgesics opioid, diamorphine, Effect of i.v. diamorphine on the expression of spinal block, HENDERSON, D. J., et al., 610–611

— Analgesics opioid, fentanyl, Bupivacaine-free analgesia for the first stage of labour with clomidine-fentanyl, BUGGY, D., (ARS) 481P

— Comparison of extradural fentanyl, bupivacaine and two fentanyl–bupivacaine mixtures for pain relief after abdominal surgery, TORDA, A., et al., 35–40

— Extradural fentanyl for postoperative analgesia: predominant spinal or systemic action? COOPER, D. W., et al., 184–187

— Analgesics opioid, morphone, Actions of morphine on noradrenaline efflux in the rat locus coeruleus are mediated via both opioid and α2 adrenoceptor mechanisms, JÖRÄ, C. M., et al., 73–78

— Effects of extradural sufentanil and morphine on ventilation, DRUMMOND, G. B., (C) 492–493

— Effects of extradural sufentanil and morphine on ventilation, ROSEN, M., (C) 493

— Effects of extradural sufentanil and morphine on ventilation, ROSEN, M., (C) 493

— Effects of extradural sufentanil and morphine on ventilation, ROSEN, M., (C) 493

— Effects of extradural sufentanil and morphine on ventilation, ROSEN, M., (C) 493

— Effects of extradural sufentanil and morphine on ventilation, ROSEN, M., (C) 493
